

## AURELIJA BUDRECKYTE

Cybersecurity professional | SIEM, Python, Data Integrity

+17814699810 | Boston, MA | [aurelijabudrekyte@gmail.com](mailto:aurelijabudrekyte@gmail.com) | [LinkedIn](#) | [GitHub](#) | [TryHackMe](#)

### PROFESSIONAL SUMMARY:

Cybersecurity professional with applied experience in SOC workflows, SIEM analysis, and threat detection. Over the past six years, I have safeguarded data quality, managed sensitive healthcare information, and enhanced business processes at Dana-Farber Cancer Institute. I hold a CompTIA Security+ certification and am experienced in Python and Bash for automation, Splunk for log analysis, and assuring HIPAA compliance. I am seeking positions as a Cybersecurity Analyst, SOC Analyst, Incident Response Analyst, Vulnerability Management Analyst, Risk Analyst, or Information Security Analyst.

### WORK EXPERIENCE:

---

#### Dana-Farber Cancer Institute - Data Integrity Analyst II - Boston, MA

*Jul 2022 - Present*

- Maintained confidentiality of 120 patient records daily, monitoring access permissions and securing sensitive healthcare data to ensure HIPAA compliance.
- Developed competencies in alert review, evidence management, and incident documentation through performing data discrepancy reviews, validating records across enterprise systems, and documenting corrective actions.
- Automated data analysis tasks using Python, leading to a reduction in preparation time of ~45% and manual errors of 32%. This demonstrates my scripting skills, quality control, and ability to develop repeatable processes for security operations.
- Reduced research-related A/R by 10-15% through streamlined business workflows. I did this by identifying root causes, cutting errors and making processes more consistent.

#### Dana-Farber Cancer Institute - Data Integrity Analyst I - Boston, MA

*Jul 2019 - Jun 2022*

- Analyzed large daily data sets in Epic and OnCore for anomalies, researched data inconsistencies and prioritized critical issues with a risk-based approach
- Developed checklists, handoff templates, workflow controls and SOPs for sensitive data handling in regulated processes. This improved standardization, accountability and policy adherence. I also helped prepare evidence and ensured proper documentation and tracking of processes.

#### Earlier Experience 2015 - 2019

- Assistant General Manager, Supervisor, Data Processing Specialist

### SKILLS:

---

**Security Operations:** SIEM analysis, alert triage, threat detection, phishing analysis, incident response, vulnerability assessment, log analysis, forensic documentation

**Technical:** Python scripting, Bash, SQL, Splunk, CLI, Azure fundamentals, MATLAB, HTML/CSS

**Risk & Compliance:** Risk analysis, HIPAA compliance, data validity controls, audit support, policy compliance, process documentation, regulatory frameworks

**Platforms:** Epic, OnCore, EHR systems, enterprise data management, evidence tracking

### EDUCATION:

---

Bachelor of Science in Mathematics and Informatics – Vytautas Magnus University – 2015, *Vilnius, Lithuania*

Bachelor's Thesis: Comparison of sampling designs in estimation of population parameters (calculations made using MATLAB)

Coursework included mathematical analysis, programming fundamentals, probability and statistics, statistical software, and MATLAB-based population-parameter analysis.

### CERTIFICATIONS:

---

CompTIA Security+ (SY0-701) - CompTIA, *Aug 2025*

Microsoft Certified: Azure Fundamentals - Microsoft, *Feb 2025*

Splunk Core Certified User - Splunk, *Dec 2024*

Google Cybersecurity Professional Certificate *Aug 2024*

TryHackMe: Pre Security, Security 101, AI Security completed, SOC Level 1 in progress

### PROJECTS:

---

*Mastercard Cybersecurity Virtual Experience (Forge)*, January 2025: I completed an analyst simulation focused on phishing threat reporting, finding security awareness gaps, and recommending training and process improvements.

*TryHackMe Learning Path*: I completed the Pre Security, Security 101, and AI Security courses and am progressing through SOC Level 1. This includes hands-on practice in security basics, blue-team concepts, and analyst workflows.
